

## Manufacturing Investment

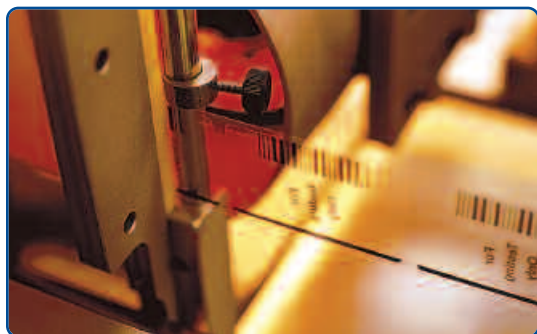

## Outsourcing with Baxter: A strategic partnership that yields solid results.

Biopharmaceutical companies are increasingly choosing to outsource. Yet finding the right manufacturing partner can be a complex decision. As a dedicated global CMO with more than 75 years of parenteral manufacturing expertise, Baxter can help you optimize the return on your outsourcing investment, whether you are launching a delicate biologic molecule or require customized support for an existing brand.

### RELY ON HIGH-SPEED, HIGH-EFFICIENCY MANUFACTURING.

Baxter has some of the world's most advanced facilities to help you keep your product flowing smoothly to market—without diverting valuable funds for capital investment or shifting focus from your company's core competencies.

Flexible production capabilities and strict capacity scheduling also help ensure a reliable product supply and reduce the potential for shortages and the resulting impact on your brand.

### ELIMINATE UNNECESSARY MANUFACTURING EXPENSES.

- Installation of new production lines
- Facility maintenance and technology upgrades
- Staff training, benefits, and liability
- Quality assurance and FDA/government inspections
- Contingency planning for product shortages

## Why outsource with Baxter? The answers are clear.

### WORLD-CLASS EXPERTISE.

- Dedicated, multidisciplinary project teams optimize efficiency and yield throughout manufacturing.
- Scientists with decades of experience provide unmatched development and formulation expertise.
- Broad product experience covers virtually all drug classes—a key advantage for anticipating and solving problems.
- Continuing investment in facility, equipment, and training maintains leading-edge services.

### RELIABLE, HIGH-QUALITY SUPPLY.

- Expanded production capabilities and proven expertise help shorten time to market.
- Award-winning resources in Bloomington, Indiana, offer uniquely flexible, high-volume manufacturing.
- All parenteral needs are handled in one location—accelerating production from clinical through commercial development.
- Multiple like-in-kind filling lines and strict capacity planning help ensure consistent, timely delivery.

### CRITICAL BOTTOM-LINE RESULTS.

- Baxter's Lyophilization Center of Excellence provides innovative solutions for cycle optimization and manufacturing efficiency.
- Outstanding regulatory compliance record helps avoid costly approval delays.
- Life cycle management solutions from formulation through packaging help maximize valuable API—and increase your product's market potential.
