

Speed-to-Market Manufacturing

Accelerate your time to market.

MANUFACTURING WITH BAXTER KEEPS YOUR MOLECULE ON TRACK.

When you're launching a new product, every day is critical. Baxter's world-class outsourcing capabilities get your molecule to market with the speed, quality, and confidence your company is counting on.

- Dedicated parenteral and cytotoxic manufacturing facilities give you access to state-of-the-art form, fill, and finish technologies.
- Experienced project management keeps your launch on schedule to help jump-start stronger sales.
- On-site problem-solving expertise helps you overcome delays and ensure a solid return on your molecule's investment.
- Reliable, efficient outsourcing eliminates capital investment costs while saving time for critical internal initiatives.
- Timely market delivery helps meet your commitment to company stakeholders.
- Outstanding compliance record expedites the approval process.

FLEXIBILITY AND FOCUS: BENEFITS OF OUTSOURCING WITH BAXTER.

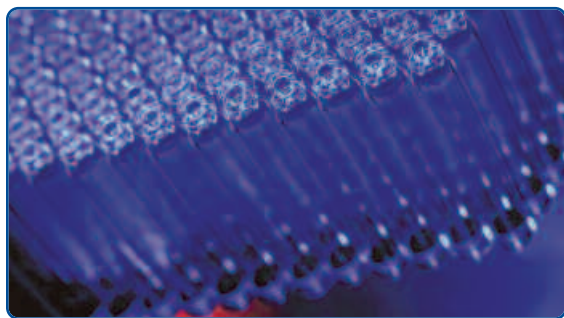

- Dedicated, highly responsive parenteral and cytotoxic manufacturing
- Clinical scale-up through full commercial production
- Specialized biologic manufacturing
- High-speed, flexible capacity for syringe, vial, and cartridge filling
- Aseptic formulation in a Class 100 environment
- On-site Baxter Lyophilization Center of Excellence
- Global regulatory expertise

Optimize your production potential.

EXPERT MANUFACTURING ENSURES SUPPLY.

- Award-winning resources in Bloomington, Indiana, accommodate excess capacity to meet market demands throughout your product's life cycle—and deliver time-sensitive advantages in competitive drug classes.
- All parenteral needs are handled in one location, accelerating clinical through commercial development.
- Multiple like-in-kind filling lines and strict capacity planning help ensure timely delivery.
- Prevalidated, in-stock formulary components save time and money while reducing risks.
- Established sWFI and bWFI Drug Master Files streamline approvals up to 3 years in advance.

EXPERTISE SIMPLIFIES COMPLEX CHALLENGES.

- Scientists highly skilled in the development of solutions, suspensions, and freeze-dried dosage forms help optimize product quality throughout manufacturing.
- On-site expertise helps overcome technical challenges with greater accuracy and efficiency.
- Baxter's Lyophilization Center of Excellence provides industry-leading solutions for cycle optimization and manufacturing efficiency.
- Specialized biologic resources offer a unique environment for successful commercialization of sensitive molecules.

PARTNERSHIP DELIVERS BOTTOM-LINE RESULTS.

- Powerful manufacturing technology increases speed to market for faster sales.
- Outstanding regulatory compliance record helps avoid costly approval delays.
- Innovative solutions from formulation through packaging help maximize valuable API—and increase your product's market potential.
- Dedicated CMO with flexibility and responsiveness helps ensure speed to market.
